Preface

This module contains additional statistic modules for ticket analysis of OTRS.

If you have questions regarding this document or if you need further information, please log in to our customer portal at portal.otrs.com with your OTRS ID and create a ticket.

You do not have an OTRS ID yet? Register here for free.

Chapter 1. Feature List

1. Stats for Queue Resting Time

You are able to calculate the resting time of tickets for queues with this statistic module. The statistic considering also the close times of tickets. This accounted time will not added to the resting time or the resting time based on working period. The resting time based on working periods will be only displayed if you have configured calendars for your queues.

Available columns are:

- Number - numeration of the ticket list.
- Ticket# - ticket number.
- Ticket ID - internal ID of ticket.
- Created - ticket creation date.
- Changed - last change date of the ticket.
- Closed - last close date of the ticket.
- Status - current state of the ticket.
- Type - current type of the ticket.
- Queue - current queue based of the history entries.
- Queue join time - date based on history entries (ticket created in this queue, moved into this queue while being open or reopened in this queue).
- Queue left time - date based on history entries (ticket closed in this queue or moved out of this queue while being open). Empty if ticket was still open and in this queue at end of reporting time-frame.
- Resting time (seconds) - count of the duration when the ticket stayed in the queue, based on join and left time. Times in which a ticket was closed will not be counted.
- Resting time (HH::MM:SS) - count of the duration when the ticket stayed in the queue, formatted as hours, minutes and seconds.
- Resting time (Working hours, seconds) - count of the duration when the ticket stayed in the queue based on the queue configured working calendars in the system configuration (this field will be empty if no calendar is configured).
- Resting time Working hours, HH:MM:SS) - formatted count of the duration when the ticket stayed in the queue based on the queue configured working calendars in the system configuration (this field will be empty if no calendar is configured).
- Criticality - current Criticality of the ticket.
- Impact - current impact of the ticket.

2. Stats for Queue Working Time

This statistic is a modified ticket list to calculate the display the working time per queue.

This modified ticket list statistic contains 3 new columns for the X axis.

In general the time for the 3 new columns is calculated on the time where ticket was not in a closed, removed or merged state type.

Example queue *Misc*:

Queue Misc time contains the time the agent have worked on the ticket.

Queue Misc working time contains the time the agent have worked on the ticket based on the working calendars of the queue *Misc*.

Queue Misc Effective time contains the time the agent set as time units for the ticket while it was in the queue *Misc*. The values are displayed for each agent by first and last name in the same column (comma separated).

3. Stats for Response Statistic

This static type statistic make it possible to count how many times a response template has been used on a time frame.

The result can be filtered by a time period and by queues.

Chapter 2. System Requirements

1. Framework

The following OTRS Framework is required:

- 6.0.26

2. Packages

The following packages are required:

- None

3. Operating System

This package requires one of the following operating systems:

- None

4. Third Party Software

This third party software is required to use this package:

- None.

Chapter 3. Installation

The following instructions explain how to install the package. There are two possibilities.

1. Admin Interface

Please use the following URL to install the package utilizing the Admin Interface (please note that you need to be in the "admin" group).

http://localhost/otrs/index.pl?Action=AdminPackageManager

2. Command Line

Whenever you cannot use the Admin Interface for whatever reason, you may use the following command line tool ("bin/otrs.Console.pl Admin::Package::Install") instead.

```
shell> bin/otrs.Console.pl Admin::Package::Install /path/to/OTRSExtendedTicketStats-6.0.14.opm
```

Chapter 4. Configuration

The package can be configured via the System Configuration in the Admin Interface. The following configuration options are available:

1. QueueRestingTime::HistorySearchLimit

Navigation: Core::Stats.

This setting defines a limit for query results on ticket history table for OTRSStatsQueueRestingTime stat.

2. Stats::DynamicObjectRegistration###OTRSStatsQueueRestingTime

Navigation: Core::Stats.

Module to generate statistics about ticket duration of stay in queues.

3. Stats::DynamicObjectRegistration###OTRSStatsQueueWorkingTime

Navigation: Core::Stats.

A modified ticket list statistic to display the working time per queue.

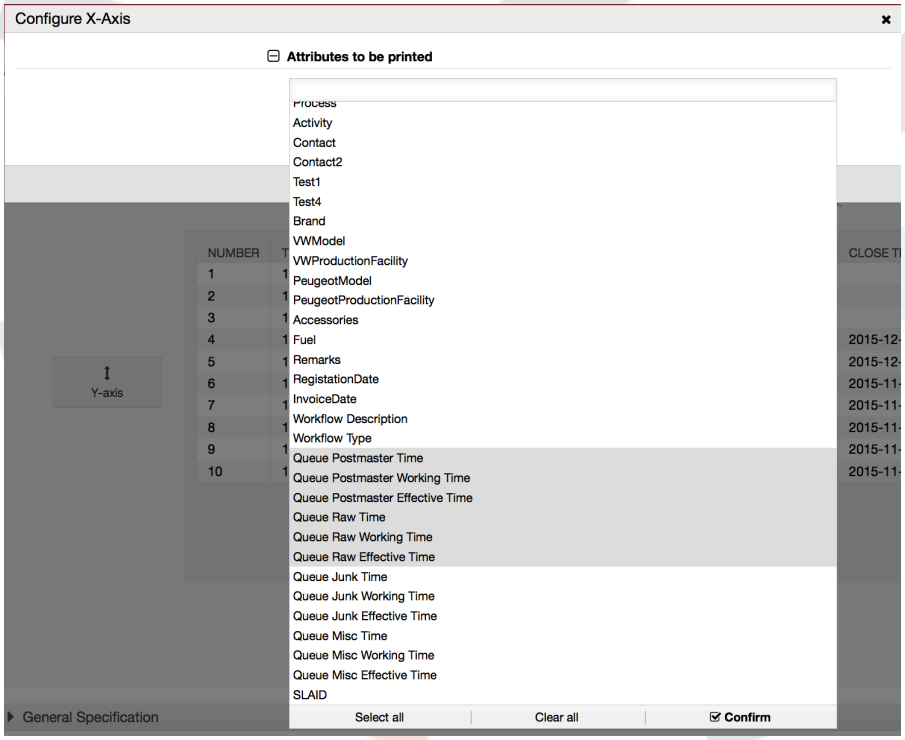

Chapter 5. Usage

1. Stats for Queue Resting Time

1. Choose the *Reports* → *Statistics* menu and create a new statistic.
2. Choose the dynamic object `OTRSStatsQueueRestingTime` and configure the rest of the configuration options according to your wishes.
3. After the configuration you can run the statistic with output print or CSV.
4. All tickets matching the restrictions will be shown. Additional tickets will be shown, if the were created before the beginning of the reported and were still open during the reporting time frame.

2. Stats for Queue Working Time

1. Choose the *Reports* → *Statistics* menu and create a new statistic.
2. Choose the dynamic object `OTRSStatsQueueWorkingTime`.
3. Select the columns for the queue you like to display the working time or time.

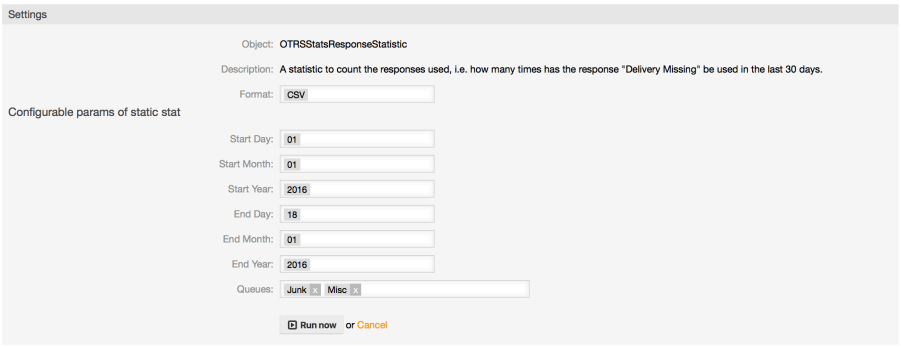

4. Set all other restrictions and sort options you need for the statistic to complete the configuration.
5. Generate your statistic.

3. Stats for Response Statistic

1. Choose the *Reports* → *Statistics* menu and search for *Response Statistic* (it was created during package install).

2. Click on *Run now* link.

3. Select the time frame and the queues to include in the statistic.

4. Generate your statistic.

Chapter 6. Technical Implementation Details

1. Kernel/Config/Files/XML/OTRSExtendedTicketStats.xml

New: Configuration file that holds the required settings for the correct functionality of this package.

2. Kernel/Language/de_OTRSExtendedTicketStats.pm

New: German translation file for this package.

3. Kernel/Language/hu_OTRSExtendedTicketStats.pm

New: Hungarian translation file for this package.

4. Kernel/System/Stats/Dynamic/OTRSStatsQueueRestingTime.pm

New: Dynamic statistic module that reads all changes of tickets of a configured time period. It will create based on this information a dynamic statistic about the resting times of tickets, which will be displayed for queues. This information will be created based on the history information of the tickets. The close times of the tickets will not considered in the resting times.

5. Kernel/System/Stats/Dynamic/OTRSStatsQueueWorkingTime.pm

New: Dynamic statistic module that uses customized version of the ticket list statistic to calculate the working times of the ticket in queues.

6. Kernel/System/Stats/Static/OTRSStatsResponseStatistic.pm

New: Static statistic module that sums all used response templates on certain queues under a defined time period.

7. scripts/test/OTRSStatsQueueRestingTime.t

New: Test file for OTRSStatsQueueRestingTime statistics module.

8. scripts/test/OTRSStatsQueueWorkingTime.t

New: Test file for OTRSStatsQueueWorkingTime statistics module.

9. scripts/test/OTRSStatsResponseStatistic.t

New: Test file for OTRSStatsResponseStatistic statistics module.

10. var/packagesetup/OTRSExtendedTicketStats.pm

New: Package helper to perform code operations during package setup.

11. var/stats/OTRSStats-ResponseStatistic.xml

New: Statistics template for OTRSStatsResponseStatistic statistics module.

Chapter 7. File List

This list shows all included files and the referring permissions.

- (660) Kernel/Config/Files/XML/OTRSExtendedTicketStats.xml
- (660) Kernel/Language/de_OTRSExtendedTicketStats.pm
- (660) Kernel/Language/hu_OTRSExtendedTicketStats.pm
- (660) Kernel/System/Stats/Dynamic/OTRSStatsQueueRestingTime.pm
- (660) Kernel/System/Stats/Dynamic/OTRSStatsQueueWorkingTime.pm
- (660) Kernel/System/Stats/Static/OTRSStatsResponseStatistic.pm
- (660) scripts/test/OTRSStatsQueueRestingTime.t
- (660) scripts/test/OTRSStatsQueueWorkingTime.t
- (660) scripts/test/OTRSStatsResponseStatistic.t
- (660) var/packagesetup/OTRSExtendedTicketStats.pm
- (660) var/stats/OTRSStats-ResponseStatistic.xml

Chapter 8. Tests

This module has been quality assured according to the current OTRS guidelines.

1. Test Cases

To test this package please follow the examples described in the Usage section.

2. Unit Test

To ensure the quality of the module, several so-called unit tests were created, to test the functionalities of this module. These unit tests can be run via command line.

ATTENTION: Please never run unit tests on a productive system, since the added test data to the system will no longer be removed. Always use a test system.

Run the package specific unit tests

To run only the unit test which will be delivered with this package, use the following command on the command line:

```
shell> perl bin/otrs.Console.pl Dev::UnitTest::Run --test OTRSStatsQueueRestingTime
shell> perl bin/otrs.Console.pl Dev::UnitTest::Run --test OTRSStatsQueueWorkingTime
shell> perl bin/otrs.Console.pl Dev::UnitTest::Run --test OTRSStatsResponseStatistic
```

Run all available unit tests

To run all available unit tests, use the following command on the command line:

```
shell> perl bin/otrs.Console.pl Dev::UnitTest::Run
```

Chapter 9. Change Log

6.0.14 / 2020-01-29 13:16:23

- - Updated framework files to OTRS 6.0.26. - Tidied. - Updated copyright.

6.0.13 / 2019-11-07 09:26:19

- - Updated Hungarian translation.

6.0.12 / 2019-08-13 16:50:54

- - Updated framework files to OTRS 6.0.21. - Updated German translation.

6.0.11 / 2019-07-04 13:48:59

- - Tidied.

6.0.10 / 2019-04-11 10:54:40

- - Updated framework files to OTRS 6.0.18.

6.0.9 / 2019-01-18 14:38:01

- - Updated framework files to OTRS 6.0.16. - Updated copyright.

6.0.8 / 2018-12-11 22:35:55

- - Updated framework files to OTRS 6.0.15. - Tidied.

6.0.7 / 2018-09-15 18:39:31

- - Updated framework files to OTRS 6.0.11. - Tidied. - Updated license information. - Updated documentation.

6.0.6 / 2018-07-24 10:53:34

- - Updated documentation. - Improved wording, added Hungarian translation.

6.0.5 / 2018-06-12 15:19:06

- - Fixed unit test. - Enabled on-demand testing.

6.0.4 / 2018-05-03 08:26:50

- - Updated framework files to OTRS 6.0.7.

6.0.3 / 2018-01-16 09:17:28

- - Updated framework files to OTRS 6.0.4. - Updated copyright.

6.0.2 / 2017-11-23 10:26:40

- Build for OTRS 6 patch level 1.

6.0.1 / 2017-11-22 11:36:41

- First release for OTRS 6.
